

Explorers wanted!

Are you fascinated by enzymes, biotechnology and genetics? Do you want to work on exciting science projects with your colleagues in the lab? Have you ever dreamt of creating products that help making the world more sustainable and more productive?

Then you've come to the right place.

Aminoverse is a young biotech company in Nuth, Netherlands close to the German and Belgian border. We are committed to pushing the scientific frontier in enzyme science for our clients which include large corporations worldwide like the top10 pharmaceutical companies.

To reinforce our R&D and enzyme production team in the lab, we are looking for a new colleague in the position of

Technical Assistant – R&D (m/f)

You can expect

- Lab work in at least one of the following fields (*will be adapted to your background and interest*):
 - molecular biology, including PCR, cloning, transformation, gel electrophoresis (SDS-PAGE), ELISA
 - enzyme production, including cell culture of GMOs such as *E. coli* and *P. pastoris*, scaling from microtiter plates to fermentation, downstreaming and formulation

- biocatalysis, including enzyme assays, stability studies and characterization with colorimetric/fluorometric assays
- General laboratory activities and duties, including autoclaving, buffer and media production, logistics, warehousing
- A new biological safety level 1 laboratory from 2020
- A young, dynamic team with a flat hierarchy that works together for 10 years
- A really friendly and pleasant atmosphere including team events and birthday cakes
- A standard dutch 1-year full-time contract (35-40h/week) with a 1-month probation period and the prospect of a permanent position - we are interested in the long-term and hope you are too!
- 30 days of flexible holidays per year
- 2 days free lunch per week on optional basis
- 1-2 weekly COVID-19 qPCR tests to ensure a safe working environment
- Have we already mentioned the great team?

What you ideally bring with you

- A completed apprenticeship as a MBO/HBO/BTA/CTA/MTA or a completed B.Sc. degree in a comparable field
- Pleasure in clean and precise work
- Reliability and the desire to take responsibility for your own work
- The goal of working in a company for the long-term
- Openness to software such as Microsoft Word, Excel, Powerpoint and programmes for laboratory equipment as well as electronic laboratory books
- Good knowledge in either German or English language
- Work experience helps, but is not a must. We are open to talents at the start of their career

What you need to bring with you

- Enjoy biotechnological research and working in the lab as part of a team
- The wish to learn and discover

The position is available immediately.

We caught your attention?

Then we look forward to receiving your application including a motivation letter in German or English and meeting you personally.

Feel free to reach out directly to Mr. David Schönauer via career@aminoverse.com for submitting the application documents or any open questions.

We are a growing start-up and foresee to have more vacant positions in the future. We are therefore always looking for talents to include in our talent pool.
